```

1. Display all words from a passage
2. Display all unique words from a passage
3. Display all unique words in sorted order
4. Display all unique words with its frequencies in sorted order

1. Display all words from a passage

- Input Passage:

I go to school by bus. The bus is big. The school is also big. I like big school and big bus.

- Output:

```
I  
go  
to  
school  
by  
bus  
The  
bus  
is  
big  
The  
school  
is  
also  
Big  
I  
like  
big  
school  
and  
big  
bus
```

Algorithm : Display all words

Read a passage

For all words in the passage:

Push the word **at the back** of list

Display the list

```
1 import java.util.*;
2 public class MyList {
3     public static void main(String args[])
4     {
5         List<String> list1 = new ArrayList<String>();
6         Scanner in = new Scanner(System.in);
7
8         String passage = in.nextLine(); // read input passage
9
10        String delims = "\\W+"; // split any non-word
11        String [] words = passage.split(delims);
12        for (String str : words){
13            str = str.trim();
14            list1.add(str);
15        }
16        System.out.println("list1:" + list1);
17    }
18 }
19
```

2. Display all unique words from a passage

- Input:

I go to school by bus. The bus is big. The school is also big. I like big school and big bus.

- Output:

I
go
to
school
by
bus
the
is
big
also
like
and

- Input:

I go to **school** by **bus**. **The bus is big. The school is also big. I like big school and big bus.**

- Output:

I
go
to
school
by
bus
the
is
big
also
like
and

Algorithm : Display all unique words from a passage

Read a passage

For all words in the passage:

If the word does not exist in list

Push the word at the back of list

Display the list.

**Check to make
sure the word
not exist before
add it into list**

```
1 import java.util.*;
2 public class MyList {
3     public static void main(String args[])
4     {
5         List<String> list1 = new ArrayList<String>();
6         Scanner in = new Scanner(System.in);
7
8         String passage = in.nextLine(); // read input passage
9
10        String delims = "\\W+"; // split any non-word
11        String [] words = passage.split(delims);
12        for (String str : words){
13            str = str.trim();
14            list1.add(str);
15        }
16        System.out.println("list1:" + list1);
17    }
18 }
19
```

3. Display all unique words in sorted order

- Input:

I go to school by bus. The bus is big. The school is also big. I like big school and big bus.

- Output with frequency:

also

and

big

bus

by

go

I

is

like

school

to

The

Algorithm

Unique words

Read a passage

For all words in the passage:

 If the word does not exist in list

 Push the word at the back of list

Display the list.

Unique + sorted words

Read a passage

For all words in the passage:

If the word does not exist in list

Determine suitable position to insert in list

Insert the word at the respective position of list

Display the list.

Algorithm

1

Unique + sorted words

Read a passage

For all words in the passage:

If the word does not exist in list

Determine suitable position to insert in list

Insert the word at the respective position of list

Display the list.

Unique + sorted words

Read a passage

For all words in the passage:

If the word does not exist in list

Insert the word at the back of list

Sort the list.

Display the list.

2

Non-recurring

Input: 10 12 28 10 34 25 88 10 34 8

⋮

Output: 10 ... ??

Non-recurring + sorted

Input: 10 12 28 10 34 25 88 10 34 8

⋮

Output: 10 ... ??

4. Display all unique words with its frequencies in sorted order

- Input:

I go to school by bus. The bus is big. The school is also big. I like big school and big bus.

- Output with frequency and sorted:

also
and
big (4)
bus (3)
by
go
I (2)
is (2)
like
school (3)
the (2)
to

Demonstration 1

Aim: Put integers in list

Demonstration 2

Aim: Put strings in list

Other problem

Write a menu-driven program, that can add, remove and display a list of things to buy. Please consider possible error messages.

Things to buy:

1. Display things.
2. Add thing.
3. Remove thing.
4. Exit.
